

PRECISION MEDICINE IN AUTISM - RESEARCH PROGRAM

PRISMA STUDY

Our research study, Identifying Challenges and Opportunities for Implementing Standard of Care Genetic Testing for Autism and Neurodevelopmental Conditions, is enrolling children and adults who have been diagnosed with autism and reside in Alberta. The study aims to understand the experiences and opinions of individuals on the autism spectrum and their families regarding genetic testing for autism. Participation will take approximately two hours and involves completing an online survey and interview. As a thank-you, you will receive a gift card for completing the survey. To participate, contact Dr. Daniel Moreno De Luca or the PRISMA research staff at +1 780 492 4467 or prisma@ualberta.ca
